- The initiatives of the working group shall contribute to the implementation of the Paris Agreement and the EU Energy and Climate package.
- The work should be done in close connection with the activities of Priority Area 2 of the EUSDR.
- The focus should be on dissemination, know how transfer, exchange of best practice (particularly on successful networks of regions and cities, e.g. „Climate Alliance“ and „European Energy Award“) as well as on using synergies with other transnational working partnerships and initiatives, such as the „European Region Danube-Vltava“.
- Successful projects of the past should be continued in the near future and new projects should be initiated.
