

ANTINUCLEAR COOPERATION REGION DANUBE AND NEIGHBOURS

ST. POELTEN 25.04.2014

RESOLUTION

1. NO to new nuclear power plants.
2. No lifetime extension of plants beyond originally designed lifetime.
3. Nuclear safety authorities need the input from the critical public which can be represented by a member of civil society.
4. Preparing sites for final waste repositories need to respect principles of democracy and public participation.
5. Existing plants have to be continuously upgraded to meet up-to-date safety standards; in any case they must be shut down as soon as possible.
6. Maximum transparency in accordance with the Aarhus Convention.
7. Abolishing of subsidies for nuclear energy to end any distortion of competition (as reduced liability of nuclear damage, low level of insurance etc.).
All costs arising from the operation of NPPs must be borne by the nuclear industry.
8. Full and timely information about the safety of NPPs and of health parameters in the vicinity of NPPs – easily accessible for all citizens.
9. Promotion of renewable energy and energy efficiency projects by our governments and accelerated phase-out of nuclear power.
10. Climate targets for 2030 including renewables without allowing the nuclear industry to present nuclear energy as a green, climate-friendly energy.
